

Logistics at NITRAS

AutoStore Extension

CUSTOMER SPECIFIC SOLUTIONS EFFICIENT SHORT DELIVERY TIMES

INNOVATIVE LOGISTICS

We have been your reliable partner for personal protective equipment and workwear since 1986 - and since then we have set the highest standards for ourselves.

We always pay attention to the highest quality standards, customer specific solutions and thus offer an ever broader and deeper range of products. In order to be able to continue to cope with the increased demands, we have constantly modernised and optimised our logistics over the past months and years.

In order to make the best possible use of the existing storage space and to cope with the increasing picking requirements, we have decided to use AutoStore. This allows us to reduce the space required by 75% and at the same time increase our efficiency and speed.

With the AutoStore expansion, we make sure that you will continue to benefit from the shortest possible delivery from stock.

MORE STORAGE SPACE

Since we want to stick to our quality and increase it even further, we adapt to our new challenges every day. Flexibility and competence are important cornerstones of what we do.

To meet even more demands, we have expanded our storage capacity by 5,000 spaces. With more space in our AutoStore, we can store more goods than with a conventional storage method.

With constant access to our stock, we are extremely flexible and less time-bound. This means we can continue to offer you the shortest delivery times from the factory, innovation and mobility, and continue to make your life easier.

Grow with us!

Your NITRAS Team

5,000 SPACES
